Request for Proposals: Winter Road Construction, Yellowknife Exploration

Nov 13, 2026

Issued by	Gold Terra Resource Corp.
RFP number	20261102
Issue date	November 13, 2026
Closing	November 30, 2026, 4:00 pm MT
Contact	Hayden Playter, Drill Program Manager, hplayter@goldterracorp.com

1. Purpose and scope

Gold Terra Resource Corp. (Gold Terra) invites proposals from qualified contractors to build, maintain and decommission winter access roads and drill pads for exploration near Yellowknife, NT, for the [2026-27] winter season.

The work includes:

- Ice road and overland winter trail construction, including flooding and ice thickness monitoring
- Snow clearing and road maintenance throughout the season
- Drill pad and staging area preparation
- Spring decommissioning and site cleanup to permit conditions

Approximate road length, routes and site locations are shown in Appendix A. Gold Terra may award all or part of the work to one or more contractors.

2. What to submit

Respondents decide the level of detail to provide. The completeness, clarity and organization of each proposal will be read as an indication of how the respondent plans and manages its work. Proposals should address:

1. **Equipment:** what you will commit, its availability, and how you will get it to site.
2. **Rates:** your pricing for the scope and the basis for it.

3. **Experience:** relevant winter road work, references, and the people who will do this job.
4. **Indigenous participation:** your commitments and how you will demonstrate them.
5. **Safety:** your record and how you will manage the risks of this work.
6. **Schedule:** when the road will be open and what that depends on.

3. Environmental compliance

The contractor must comply with Gold Terra's land use permit and water license for this work and all applicable legislation. Proposals should explain how the respondent will meet these obligations, including route construction, water withdrawal, fuel and spill management, waste, wildlife, heritage resources, record keeping and decommissioning.

Non-compliance is grounds for stopping work or ending the contract. Fines or remediation costs caused by the contractor are the contractor's responsibility.

4. Evaluation

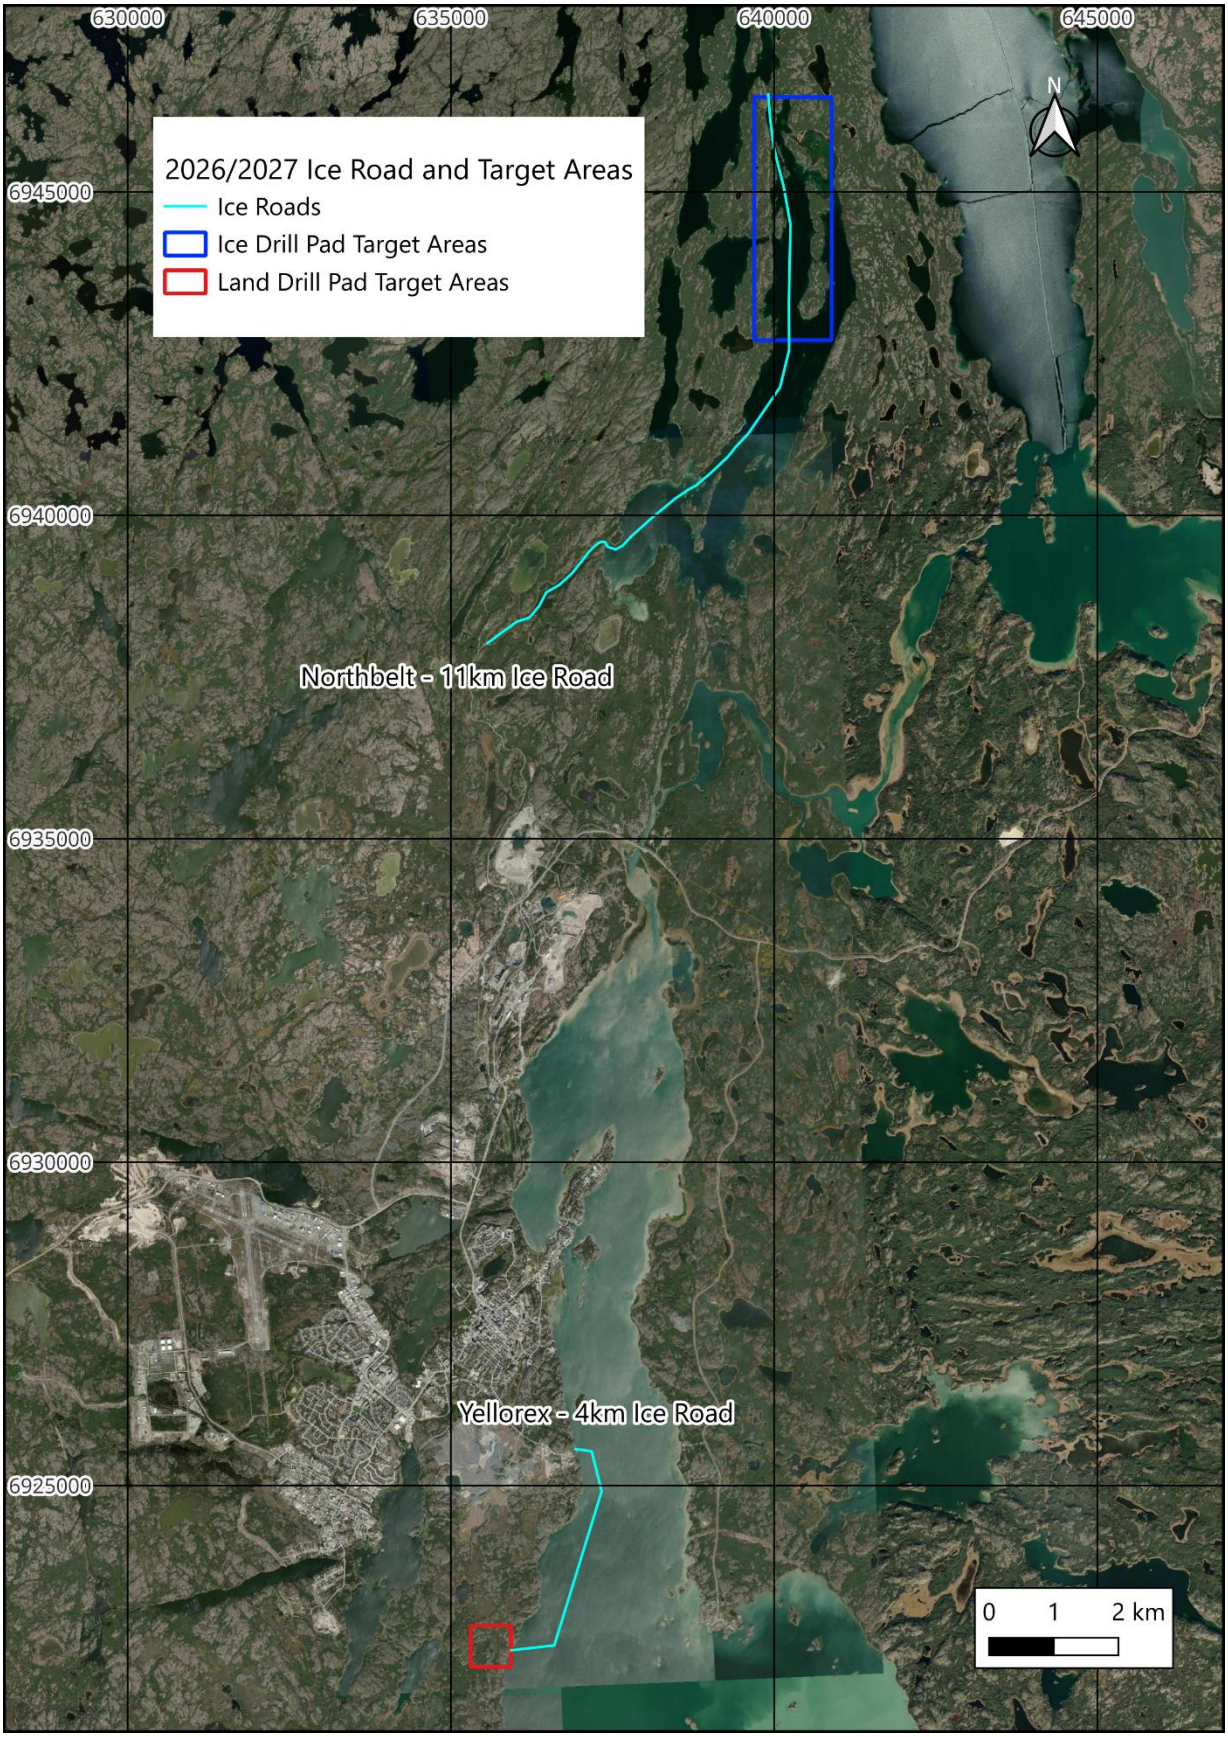

Proposals will be evaluated on rates and price, equipment, experience, Indigenous participation, safety and environmental compliance, and the quality and completeness of the proposal. Gold Terra may check references and interview proponents before award.

5. Process and terms

Step	Date
RFP issued	November 13, 2026
Questions due (written, by email)	November 23, 2026
Answers sent to all proponents	November 27, 2026
Proposals due, 4:00 pm MT	November 30, 2026
Award	December 4, 2026

- Submit one PDF by email to Hayden Playter, hplayter@goldterracorp.com. Late proposals will not be opened.
- All questions go to the contact above in writing. Answers will be shared with all proponents.
- Proponents must hold, or obtain before award, WSCC coverage in the NWT, commercial general liability insurance of at least $5,000,000 and a business license where required.
- Gold Terra is not obliged to accept the lowest or any proposal and may negotiate with one or more proponents. Proponents bear their own costs of preparing a proposal.
- Information submitted will be kept confidential and used only to evaluate proposals.
